

## SIP as a Service

New Era Technology's CloudBlu SIP as a Service is flexible, scalable, and offers world-class support.

SIP as a Service provides high-quality calling across North America and can be provisioned in real-time, installed, and turned up remotely. All within days and not weeks. New Era's CloudBlu SIP offers reliable access to cloud-based voice and E911 and is built for scale.

SIP Trunks allow you to eliminate costly telecom infrastructure and reap the benefits of converging your local and long-distance calling onto a single platform.

Compliant with Ray-Baum's act phase 1 and 2 regardless of your phone system.

## Highlights

- Domestic and international long distance
- Toll-free calling
- Seamless E911 integration
- Line features including directory listing, CNAM, and LIDB
- Real-time disaster recovery and IP failover control
- Secure SIP delivery over TLS
